

The Kennedy Clinic PLLC

To Our Valued Patient:

Please note that we are not informed of your individual insurance benefits. Some insurance plans cover annual physical exams and vaccinations at 100% and some do not. We also accept many insurance policies, but our office is not aware if we are on your individual plan or if we are in your network. You, the patient, are responsible to contact your insurance company regarding your benefits and/or providers prior to your visit. Once a claim is filed, we cannot refile this claim with a different service code. If the services are denied by your insurance company, you will be responsible for payment of the services rendered.

I have read the above statement and understand that my visit today will be billed as a physical/wellness exam. I also understand that I will be billed in the event that my insurance does not cover the services rendered by my doctor today.

Thank you for your cooperation in this matter. We truly want to meet your health care needs in the most appropriate manner.
